

SPECIALIST IN MOBILITY AND TRACEABILITY SOLUTIONS

Athesi
Mobile Generation

ATHESI, WHO ARE WE ?

Created in 2005, Athesi is a french company based near Paris (Bry Sur Marne). Consisting of a team of experts active in the market of automatic identification and professional mobility since 1990, our goal is to bring you a new and relevant approach.

approche nouvelle et pertinente. Thus, in order to reduce your acquisition costs, Athesi relies on a very short supply chain in order to guarantee you solutions (products and services) in total adequacy with your functional and economic imperatives. In direct connection with R&D and production plants, we offer you unequaled responsiveness.

« mieux vaut écouter la voix de la conscience que le bruit de la renommée »

Leader in the professional mobile devices, Athesi's main missions are to import and distribute a whole range of products and associated services in order to improve the efficiency and the productivity of your business.

We provide products with technologies to manage field force automation, traceability, data connection application. We help you in your digital migration with a unique offer of customizable devices that meet all the needs of the mobility

trades (tablets, terminals, PDA, rugged smartphones, ...).

From its creation, Athesi is managed by their historic owners and stay as a french independant company with equity.

The results are published from the origin of the company, showing a regular growth with a bigger and bigger customer portfolio.

This good financial health is officially recognized by La Banque de France and Coface.

CUSTOMERS

Convinced that the true performance is obtained by privileging the human value, we bring you, according to your trade, your culture, your environment, the hardware solution the most adapted by placed the men and their trades at the heart of our concerns.

Your growth is our, and our only ambition is to help you achieve your profitability and development goals.

The trust you place in us is our greatest pride. Every project is conducted with the same passion and enthusiasm.

EUROPEAN SERVICE CENTER

In our business, only few companies offer a local service repair. It is a real focus to having our own maintenance workshop to guarantee a high level of service and a perfectly mastered deadline.

Based in several countries, our maintenance centers are composed of a team of engineers and specialized technicians. Our workshop center is able to repair all the technical issues. Our technical teams are in daily contact with R&D to allow a constant high quality process of our products.

We provide a complete offer of standard service contracts customized to meet certain business constraint.

EUROPEAN TECHNICAL SUPPORT

Athesi offers you a dedicated and free technical support to assist you in the proper use of our equipment. We can also help you to prepare masters to make easier your roll out.

Depending your project size, you can be in touch with our customization service to study the possibility of modifications and adaptations of our products but also their OS and firmwares. We can also provide custom solutions for specific preparation from the plant (master installation, custom packing, labels, ...) allowing you to optimise the supply chain and thus save you time and money.

INNOVATIVE PORTFOLIO

Athesi is resolutely turned towards the future by anticipating your requests and your needs. We are often the first to adress the market with innovative products both in terms of fonctionnality and ergonomics the smallest industrial PDA or the first rugged smartphone.

We offer a unique whole range of products with different Operating Systems (Google , Microsoft), various ergonomics (tablets, rugged smartphones, PDA). The strongest advantage of our products is their very long life cycle with an average of five years of sales life and after then a minimum of 3 years of services.

In fact, unlike the mass market products that renew themselves too often, we make sure that your return on investment is in line with the product's life cycle.

The return rate of our product is very low (2 to 3 times lower than the competiton), which explains why the price of our service contracts are also lower than that of our competitors.

This is why the total cost of ownership (TCO) of our products over the amortization period (purchase cost add to the maintenance cost) is the most interested oin the market.
